Objective

I am a software developer primarily working with multi view web applications and iOS apps. I love using modern technologies to solve problems in my daily life, and I am extremely self-motivated when it comes to learning the latest tech. I am looking for a junior development position in order to expand my knowledge in the field.

Experience

Locbit Inc.   June 2015 to Present

I am currently a web developer at an Internet of Things company called Locbit. I develop web applications and views that are tailored reactively to our client's needs and feedback. I am proficient at working with large amounts of data from hundreds of devices and finding ways to display important data to clients.

Education

California State University San Marcos   August 2014 to Present

I am currently a Jr. pursuing my Bachelors Degree in Computer Science. I am active in the Computer Science department at my school and have volunteered at school-sponsored hackathons, as well as tutoring on my own time and grading for professors as a teachers assistant.

Skills

- Creating full-featured Web Apps using MVC practices
- Apps built using JQuery AngularJS, Node.js, and PHP.
- Experience with databases such as Mongodb and MySQL.
- RESTful APIs with JSON
- HTML/CSS + JavaScript websites using Bootstrap
- Experience with Repositories such as Github and Gerrit.
- Experience developing iOS applications using Swift.
- Experience in an Agile work environment
- Experience with the Internet of Things and cloud technologies
