Work Experience:

Tria Federal – Remote

November 2020 to Present

Team Lead Software Developer

- Team lead for 8 production modules, owning architecture design, sprint planning, and code reviews
- Introduced AI capabilities using AWS Bedrock to automate processes and improve efficiency via RAG, Model Context Protocol, and agent workflows
- Designed a production AI helpdesk assistant, reducing repetitive support workload
- Developed an AI orchestration library enabling tool calling and multi-step workflows across existing production applications
- Created React-based tools that reduced SDLC effort across modules by ~80%
- Built and maintained secure, HIPAA-compliant systems using Angular, Node.js, Express, Oracle, and MySQL

TDO - San Diego, CA

April 2019 to November 2020

Software Developer II

- Full-stack web development using .NET Framework and Angular 2+
- Converting desktop software into cloud-based solutions using Azure Cloud Services
- Web API development using Entity Framework and SQL
- Intuitive interface design using Angular Material components
- Agile work environment for rapid development based on user feedback
- Utilizing Asana for sprint planning, feature implementation and ticket management
- Creating HIPAA compliant software to gather and protect sensitive information

geoConvergence LLC - Murrieta, CA

May 2018 to April 2019

Software Developer

- Full-stack web development using NodeJS and Angular 2+
- REST API development using Express and MongoDB
- Project manager and team leader, executing and planning GIS projects via Jira
- Used GeoJSON and market data to visualize performance on interactive maps
- Scripting using Python to perform data migrations and manage AWS CodePipeline

Locbit Inc - San Diego, CA

May 2015 to December 2016

Jr. Software Developer

- Full-stack IoT application development for cloud automation and expenditure optimization using PHP, Angular, NodeJS, SQL and MongoDB
- Network scripting to bring offline devices onto the IoT network using Python and Raspberry Pi
- Real-time data transfer through web sockets for live interfaces and device control

Education:

Computer Science, Bachelor of Science
California State University San Marcos

August 2014 to May 2018

Skills:

Languages	JavaScript, TypeScript, Python, PHP, C++, C, C#
Frameworks	Angular, React, Next.js, Express, CakePHP, .Net Framework
Misc.	Git, Jenkins, AWS Bedrock, AWS Lambda, MCP, Tailwind CSS
